## 1.0 Introduction

Destination data refers to the % of pupils who go onto sustained education, employment or training. The data is based on:

- The year after the pupil has left compulsory schooling (i.e. academic age 16)
- Participation in education in all of the first two terms (defined as October to March) of the year after the pupil left Key Stage 4.

## 2.0 Published Destination Data

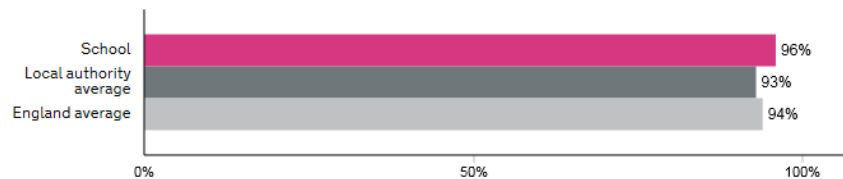

### 2.1 Historical Trends

There is a time lag between a cohort of pupils leaving an institution and the data on their destinations being published. Refer to the [DfE Destination Data - Statistical Release](#) for a full explanation.

Year	% in Sustained Education, Employment or Training	National Average	Differential
2012	86	90	-4
2013	92	92	0
2014	96	94	+2

With the exception of 2012, the % of pupils in sustained education, employment or training is in line with or above the NA.

### 2.2 Destinations in 2014

The most recently published data in the School and College Performance Tables is the 2014 cohort.

The % of pupils in sustained education, employment or training is above the NA. The breakdown is provided overleaf.
